01 / CAPABILITIES

What we put our hands on

One team runs the project from survey to sea trial — steel, paint, systems and interior on a single schedule, in a single yard. The list opposite is what happens in-house.

01

Structure & plating

Steel and aluminium renewal, reinforcement, tank works and class-witnessed repairs.

02

Paint & fairing

Enclosed, climate-controlled application from full topsides to spot repair.

03

Propulsion & systems

Main engine and gearbox overhaul, shaft alignment, hydraulics, HVAC and electrical.

04

Interior & joinery

In-house joinery, upholstery, stone and finish work to the designer's drawings.

Enclosed paint hall, climate logged for the full cycle.

Everything on one site

Berth, hall, workshops and stores inside one gate — so a job never leaves the yard to wait for a supplier.
