

1. Mengi Yay Announces Reviva Refit

PRESENTS

REVIVA REFIT

Crafting Tomorrows. Powered by Mengi Yay

Over the past decade, Mengi Yay has successfully completed an array of refit projects, including the extensive refurbishment of the 60-meter Grand Rusalina yacht. In response to increasing demand and the evolving landscape of yacht refurbishment, we are excited to announce the launch of our dedicated refit brand, Reviva Refit. This initiative is designed to bridge the industry gap, providing professional, budget-conscious, and superior-quality refits, rebuilds, and restorations.

The introduction of Reviva Refit comes at a time when the industry sees a rise in solo and freelance project managers, as well as small-scale operations. Our new brand addresses these market dynamics while upholding the quality and vision synonymous with Mengi Yay.

Reviva Refit is committed to enhancing sustainability by refitting, rebuilding, and restoring vintage yachts to pristine conditions, delivering exceptional services on time and within budget. We operate across multiple strategic locations, ensuring flexibility and maintaining competitive pricing. Our core values—quality, budget adherence, and timely delivery—reflect in every project, with technological upgrades that match the standards of new builds by Mengi Yay.

Looking ahead, our two-year plan involves expanding our facilities and services while continuing to offer competitive pricing. Over the next five years, we aim to handle up to 15 refit projects annually.

This year alone, we have completed five refit projects and secured one more for the 2024 fall season, with two additional slots still available. We warmly invite all brokers and yacht owners to request a quotation and consider Reviva Refit for their upcoming projects.
