

## Reviva Refit Proudly Announces the Relaunch of Hayat Yacht

Reviva Refit is excited to share the successful completion of a comprehensive one-month refit of M/Y Hayat, a distinguished 22.25-meter motor yacht originally built by Sunseeker in 2009. This intensive project was carried out at our Tuzla facilities during a focused period in the spring of 2024, enhancing both the yacht's performance and safety to meet the highest standards of modern yachting.

### Focused Enhancements for Optimal Performance

The refit of M/Y Hayat covered extensive engine and mechanical maintenance, ensuring all systems operate at peak efficiency. The main engines received thorough

servicing, including detailed attention to injector repairs which addressed and fixed issues with both starboard and port main engine injectors. Generator control panels were meticulously checked to ensure their reliability under all operational conditions.

### Advancements in Safety and Navigation

In keeping with our commitment to safety and precision, the yacht's fire extinguishers were completely renewed and updated. Navigation systems saw significant upgrades with updated maps and fully functional navigation lights, ensuring that M/Y Hayat is equipped to navigate safely in all conditions.

### Plumbing and Electrical Overhauls

Our team also undertook critical updates to the plumbing and electrical systems, including replacing old batteries with new ones for enhanced power reliability. The bilge pumps and seawater intake systems were serviced to ensure effective water management onboard.

### Hull and Underwater Gear Maintenance

To protect against the harsh marine environment, the hull received a new coat of silicone-based antifouling paint. Zinc anodes were replaced to combat corrosion, and a thorough check of shafts, propellers, and seals was conducted to maintain the integrity of these crucial components.

### Comprehensive Maintenance Across All Systems

Additional attention was given to the aft platform piston and the black water tank, ensuring proper functionality and hygiene. The windlass was maintained to guarantee smooth operation, and a comprehensive check of the fire system was performed to uphold stringent safety standards.

### Project Specifications at a Glance:

- **Length Overall (LOA):** 22.25m
- **Beam (B):** 5.6m
- **Draft (D):** 1.70m
- **Displacement:** 110t
- **Builder:** Sunseeker
- **Year of Build:** 2009

- **Yacht Type:** Motor Yacht
- **Naval Architect, Exterior & Interior Designer:** Sunseeker
- **Construction Material:** Fiberglass
- **Refit Year:** 2024 at Tuzla
- **Stay Duration:** 1 month
- **Type of Work:** Refit and Restoration

### A Season of Renewed Potential

As M/Y Hayat returns to the waters, it does so with enhanced capabilities and a refined aesthetic, fully prepared for the challenges and pleasures of the upcoming yachting season. This refit not only underscores Reviva Refit's expertise in managing and executing complex yacht refits but also reaffirms our dedication to maintaining the legacy of luxury yachts with modern technological standards. M/Y Hayat is now poised to deliver an exceptional sailing experience, marked by reliability, safety, and unparalleled performance.
