

## Reviva Refit Unveils the Transformative Refit of Isra Yacht

Reviva Refit is delighted to announce the completion of an extensive seven-month refit of M/Y Isra, formerly known as Deborah. This 32.92-meter motor yacht, originally constructed by Sunseeker in 2008, underwent a meticulous refit at our Tuzla facility, showcasing our commitment to excellence in yacht restoration.

### A Fusion of Elegance and Cutting-edge Technology

The refit of M/Y Isra was designed to elevate both the yacht's aesthetic appeal and operational efficiency, ensuring it meets the contemporary demands of luxury yachting.

### Interior Excellence

The interior received significant attention during this refit:

- **Interior Varnish Renewal:** All interior furniture was treated with new varnish, restoring its original luster and offering enhanced protection.
- **Wall and Ceiling Coverings:** These were completely replaced, transforming the interior ambiance with a fresh and modern aesthetic.

## Exquisite Exterior Upgrades

On the exterior, the enhancements focused on both beauty and functionality:

- **New Exterior Furniture:** Custom-designed furniture was crafted and installed on the main deck, enhancing the yacht's outdoor living spaces.
- **Hull Film Coating:** A new film coating was applied to the hull, providing extra protection and a sleek, updated look.

## Mechanical and Technical Refinements

M/Y Isra's operational systems received comprehensive upgrades:

- **Wiper and Speaker Replacement:** New wipers and high-quality speakers were installed to improve visibility and entertainment options.
- **Chain Counter and Watermaker Installation:** A new chain counter and watermaker were installed, enhancing anchor management and water supply reliability.
- **Hydraulic Leak Repairs and Valve Replacement:** Essential repairs were made to hydraulic systems, and all engine room valves were replaced to ensure peak performance.
- **Bilge Painting and Sunroof Motor Servicing:** These were executed to maintain cleanliness, prevent corrosion, and ensure the reliability of the sunroof operation.

## Maintenance and Protection

To further ensure the longevity and durability of the yacht:

- **Anchor and Chain Galvanization:** This process provided added durability and resistance to corrosion.
- **Sikaflex Replacement:** This was essential in maintaining the integrity of the yacht's watertight seals.

## Project Specifications at a Glance:

- **Length Overall (LOA):** 32.92m
- **Beam (B):** 6.30m
- **Draft (D):** 2.5m
- **Builder:** Sunseeker
